### **Agreement between RFET and RPT**

The Spanish Tennis Federation has announced its agreement with the RPT (Registro Profesional de Tenis) to promote the practice and coaching of tennis, and thus has acknowledged the task that RPT has fulfilled in this area for the past 27 years.

RPT, founded in Madrid in 1989, is an organization aimed at offering professional coaching courses, international certifications and integral and professional services in tennis coaching as well as promoting the practice of tennis. Founded and directed by Luis Mediero, it has credited more than 6,000 RPT certified coaches in Spain.

In this new stage, RFET is willing to integrate all the 'active' actors in the Spanish tennis arena with the objective of revitalizing and increasing the number of participants in this sport. In order to do that, it will support various promotional and competition programs as well as coaches to help them develop their coaching career. Its ultimate goal is to keep and increase the success that the Spanish Tennis has achieved in the last 25 years.

RFET and RPT are working in different programs to meet new goals. These projects will be announced soon.
